## Notes

### Fall Garden Chores – Famers Almanac

- Dig beets, carrots, and turnips as needed, but leave parsnips and sweet potatoes until a couple of frosts have sweetened them.
- Store pumpkins and winter squashes in a dry place at about 50 degrees F.
- Divide rhubarb. Include a bud with each section and plant in good rich soil with a generous dressing of manure.
- Divide perennials to invigorate the plants.
- Work a trowelful of bonemeal into the soil around older rosebushes.
- Prune grapevines.
- Lime your lawn.
- Cut out spent raspberry canes and discard.
- Check trees around your house for weak branches that should be removed by you now, rather than by snow and ice.
